## *fleet service*

Protect your investment. Reduce your liability.  
Save your staff's time.

With decades of experience in large-scale fleet management, Sawmill Cycles provides a comprehensive, safety-focused maintenance program for camp bike fleets. We move beyond simple repairs to provide a documented, professional service history that mitigates risk and ensures your program is ready for the first day of summer.

The Sawmill Service Standard:

- **Professional Mechanical Oversight:** Our expert mechanics identify and resolve potential mechanical issues before they become a liability or cause an injury.
- **Safety-First Protocol:** Every individual bicycle in your fleet is meticulously inspected and test-ridden to ensure operational integrity.
- **Liability Mitigation:** We provide a trackable service history via individual work orders for every bike. This documentation is a critical asset for camp risk management and insurance compliance.

**Logistical Excellence:**

**Full-Service Transport:** We provide seamless pick-up and delivery back to your camp, allowing your team to focus on program prep rather than logistics.

- **Maximized Staff Efficiency:** By outsourcing your fleet service to professionals, you save your summer staff dozens of hours of prep time, ensuring they are focused on campers, not chains.
- **Cost-Effective Management:** We offer a very reasonable budget-to-fleet cost ratio, providing high-level professional service at a price point that respects your seasonal operational budget.

## *staff development*

Prepare your cycling staff for success on and off the trail with our intensive, hands-on training clinic. This program is designed to transform summer staff into confident mechanics and proactive group leaders, focusing on the specific tools and terrain unique to your camp.

**Technical Proficiency & Maintenance**

- **The "Guide's Eye & Ear":** Training in diagnostic observation—learning exactly what mechanical safety concerns look like, sound like, and how to proactively avoid them.
- **The Shop & The Trail:** Comprehensive instruction covering both professional in-stand repairs and critical on-trail emergency fixes.
- **Mastery of Key Repairs:** Hands-on workshops for:
  - Flat tire repair and preventative maintenance.
  - Chain replacement and drivetrain care.
  - Bearing, derailleur, and brake system adjustments.
- **Tool & Part Literacy:** Mastery of part nomenclature and the essential use of tools, including the critical basics of proper torque for equipment longevity.

**Participant Safety & Progression**

- **The Perfect Fit:** Mastery of helmet fitting and ergonomic bike sizing to ensure camper comfort and safety.
- **Group Dynamics:** Strategies for managing groups on diverse terrain, maintaining sightlines, and implementing safety communication.
- **Skill Assessment & Coaching:** Learn how to accurately assess a camper's initial skill level and provide the technical support needed to build their cycling confidence and progression.

# Tools Helmets

Our standard package for camp bike maintenance workplace includes a toolbox pre-filled with bike specific tools and additional specialty tools that match specific parts seen in camp bikes, along with a sturdy bike repair stand and floor pump. We also offer a consumables package which includes lube, degreaser, spare cables, and tubes to match your bikes. This, along with our staff development, will allow your crew to keep up with day to day maintenance between our larger seasonal fleet maintenance.

## *Complete Tool Kit \$799\**

Stand- Park PCS 10.3, or Bench Mount Park PCS 12.2, Pedros Prestige floor pump, Parktool AK-5 Advanced Mechanic's kit, 2 headset wrenches HCW 15, freewheel removal tool, BBT-22, square taper extractor, mini pump, and multi tool.

## *Consumables Pack \$250\**

4 spray bottles of MO-94 Lube, 10 pack of mixed spare tubes that match your bikes, 6 shift cables, 4 brake cables, 3 White Lightning degreaser spray bottles, and a Park Tool grease tube

**Trek Solstice (\$50)\***

**Smith Sidekick (\$78)\***

**Smith Engage (\$115)\***

Have you checked your helmets for wear or damage?

- Helmets should not be used after a crash
- Helmets should be replaced every 5 years
- New helmets will offer easy fit setup and new safety features
- Structurally solid well fitting helmets reduces injury potential and liabilities
